"Part 8E. Beach and Inlet Management Planning.

"§ 143-215.73N. Findings.

The General Assembly makes the following findings:

- (1) North Carolina has 320 miles of ocean beach, including some of the most pristine and attractive beaches in the country.
- (2) The balance between economic development and quality of life in North Carolina has made our coast one of the most desirable along the Atlantic Seaboard.
- (3) North Carolina's beaches are vital to the State's tourism industry.
- (4) North Carolina's beaches belong to all the State's citizens and provide recreational and economic benefits to our residents statewide.
- (5) Beach erosion can threaten the economic viability of coastal communities and can significantly affect State tax revenues.

- (6) The Atlantic Seaboard is vulnerable to hurricanes and other coastal storms, and it is prudent to take precautions such as beach nourishment that protect and conserve the State's beaches and reduce property damage and flooding.
- (7) Beach renourishment as an erosion control method provides hurricane flood protection, enhances the attractiveness of beaches to tourists, restores habitat for turtles, shorebirds, and plants, and provides additional public access to beaches.
- (8) Federal policy previously favored and assisted voluntary movement of structures threatened by erosion, but this assistance is no longer available.
- (9) Relocation of structures threatened by erosion is sometimes the best available remedy for the property owner and is in the public interest.
- (10) Public parking and public access areas are needed for use by the general public to enable their enjoyment of North Carolina's beaches.
- (11) Acquisition of high erosion hazard property by local or State agencies can reduce risk to citizens and property, reduce costs to insurance policyholders, improve public access to beaches and waterways, and protect the environment.
- (12) Beach nourishment projects such as those at Wrightsville Beach and Carolina Beach have been very successful and greatly reduced property damage during ~~Hurricane Fran~~ hurricanes and other coastal storms that have impacted the State's coast.
- (13) Because local beach communities derive the primary benefits from the presence of adequate beaches, a program of beach management and restoration should not be accomplished without a commitment of local funds to combat the problem of beach erosion.
- (14) ~~The~~ With limited exceptions, the State of North Carolina prohibits seawalls and hardening the shoreline to prevent destroying the public's beaches.
- (15) Beach nourishment is encouraged by both the Coastal Resources Commission and the U.S. Army Corps of Engineers as a method to control beach erosion.
- (16) The Department of ~~Environment and Natural Resources~~ Environmental Quality has statutory authority to assist local governments in financing beach nourishment projects and is the sponsor of several federal navigation projects that result in dredging beach-quality sand.
- (17) It is declared to be a necessary governmental responsibility to properly manage and protect North Carolina's beaches from erosion and that good planning is needed to assure a cost-effective and equitable approach to beach management and restoration, and that as part of a comprehensive response to beach erosion, sound policies are needed to facilitate the ability of landowners to move threatened structures and to allow public acquisition of appropriate parcels of land for public beach access.

"§ 143-215.730. Beach and inlet management plan.

(a) The Department of ~~Environment and Natural Resources~~ Environmental Quality shall compile and evaluate information on the current conditions and erosion rates of beaches, on coastal geology, and on storm and erosion hazards for use in developing a State plan and strategy for beach management and restoration. The Department of ~~Environment and Natural Resources~~ Environmental Quality shall make this information available to local governments for use in land-use planning.

(b) The Department of ~~Environment and Natural Resources~~ Environmental Quality shall develop a multiyear beach management and restoration strategy and plan that does all of the following:

- (1) Utilizes the data and expertise available in the Divisions of Water Resources, Coastal Management, and Energy, Mineral, and Land Resources.
 - (2) Identifies the erosion rate at each beach community and estimates the degree of vulnerability to storm and hurricane damage.
 - (3) Uses the best available geological and geographical information to determine the need for and probable effectiveness of beach nourishment.
 - (4) Provides for coordination with the U.S. Army Corps of Engineers, the North Carolina Department of Transportation, the North Carolina Division of Emergency Management, and other State and federal agencies concerned with beach management issues.
 - (5) Provides a status report on all U.S. Army Corps of Engineers' beach protection projects in the planning, construction, or operational stages.
 - (6) Makes maximum feasible use of suitable sand dredged from navigation channels for beach nourishment to avoid the loss of this resource and to reduce equipment mobilization costs.
 - (7) Promotes inlet sand bypassing where needed to replicate the natural flow of sand interrupted by inlets.
 - (8) Provides for geological and environmental assessments to locate suitable materials for beach nourishment.
 - (9) Considers the regional context of beach communities to determine the most cost-effective approach to beach nourishment.
 - (10) Provides for and requires adequate public beach access, including handicapped access.
 - (11) Recommends priorities for State funding for beach nourishment projects, based on the amount of erosion occurring, the potential damage to property and to the economy, the benefits for recreation and tourism, the adequacy of public access, the availability of local government matching funds, the status of project planning, the adequacy of project engineering, the cost-effectiveness of the project, and the environmental impacts.
 - (12) Includes a four-year cycle of planned maintenance and resiliency projects for the State's beaches and inlets.
 - ~~(12)~~(13) Includes recommendations on obtaining the maximum available federal financial assistance for beach nourishment.
 - ~~(13)~~(14) Is subject to a public hearing to receive citizen input.
- (c) Each plan shall be as complete as resources and available information allow. The Department of ~~Environment and Natural Resources~~ Environmental Quality shall revise the plan every two years and shall submit the revised plan to the General Assembly no later than March 1 of each odd-numbered year. Provided the requirements of the contract continue to be met, it is the intent of the General Assembly to appropriate additional funds in future acts in the aggregate amount of one hundred ninety-eight million dollars (\$198,000,000) over the next four succeeding fiscal years to support the qualifying transformative project. "...

"SECTION 38.10.(g) A pole owner shall promptly review a request for access, perform surveys, provide estimates and final invoices, and complete, or require the completion by other attaching entities of, any make-ready work necessary for purposes of offering broadband service in an unserved area. A pole owner shall provide a good-faith estimate for any make-ready costs to the communications service provider within 60 days after receipt of a complete application for access. If requested by the communications service provider, the pole owner shall provide accompanying documentation indicating the basis of all estimated fees or other charges, including, but not limited to, administrative costs, that form the basis of its estimate. A good-faith estimate shall remain valid for 14 days. To accept a good-faith estimate, a communications service provider must provide the pole owner with written acceptance and payment of the good-faith estimate. Make-ready work shall be conditioned upon payment of the good-faith estimate and shall be completed within a reasonable time frame mutually agreed to by the

communications service provider and the pole owner. A pole owner may treat multiple requests from a single communications service provider as one application for access when the requests are filed within 90 days of one another. A pole owner may deviate from the time limits specified in this subsection during performance of make-ready work for good and sufficient cause that renders it infeasible to complete make-ready work within the time limits specified in this subsection. Any deviation from the time limits specified in this subsection shall extend for a period no longer than necessary. A communications service provider shall promptly be notified, in writing, of the reason for a deviation and the new completion date estimate. A communications service provider shall provide notice, in writing, to the pole owner no later than 14 days after attaching equipment to a pole in an unserved area. This subsection shall not apply to poles owned by a utility.

"SECTION 38.10.(h) A party subject to a dispute arising under subsection (g) of this section may invoke the dispute procedures authorized in G.S. 62-350 in the same manner as a party seeking resolution of a dispute under G.S. 62-350(c), and the Utilities Commission shall issue a final order resolving the dispute within 120 days of the date the proceedings were initiated; provided, however, the Commission may extend the time for issuance of a final order for good cause and with the agreement of all parties. In such a dispute, the Commission shall apply the provisions of this section notwithstanding any contrary provisions of any existing agreement. This subsection shall not apply to poles owned by a utility.

"SECTION 38.10.(i) No later than 60 days after the date funds are appropriated to the Program special fund, and on a quarterly basis thereafter, the Department shall maintain and publish on its website all of the following:

- (1) The number of applications for reimbursement received, processed, and rejected, including the reasons applications were rejected.
- (2) The amount of each reimbursement, the total number of reimbursements, and the status of any pending reimbursements.
- (3) The estimated remaining balance in the Program special fund.

"SECTION 38.10.(j) The following definitions apply in this section:

The term includes costs paid or incurred by the party responsible for the costs of a pole replacement to reimburse the party that performs the pole replacement. The term does not include costs that the party incurs initially that have been reimbursed to the party by another party ultimately responsible for the costs.
 - (5) Pole. – Any pole used, wholly or partly, for any wire communications or electric distribution, irrespective of who owns or operates the ~~pole~~ pole, including poles owned by a utility.
 - (6) Pole owner. – A city or cooperatively organized entity that owns utility poles.
 - (7) Qualified project. – A project undertaken by a communications service provider that is not affiliated with a pole owner seeking to provide or, due to natural disaster or other force majeure event, restore, temporarily or permanently, qualifying internet access service on a retail basis to one or more households, businesses, agricultural operations, or community access points in an unserved area.

...

- (9) Unserved area. – An area in which, according to the most recent map of fixed broadband internet access service made available by the Federal Communications Commission, fixed, terrestrial broadband service at speeds of at least 25 megabits per second download and at least 3 megabits per second upload is unavailable at the time the communications service provider requests access. An unserved area also includes an area that was previously served but has become unserved due to damage or destruction by a natural disaster. A pole or underground installation shall be presumed to be located in an unserved area if the pole is located in an area that is the subject of a federal or State grant to deploy broadband service, the conditions of which limit the availability of a grant to unserved areas or, in the case of a damaged or destroyed facility, was in such an area when the facility was originally constructed.

- (10) Utility. – As defined by 47 U.S.C. § 224.

- (1) BEAD. – Broadband Equity, Access, and Deployment.
- (2) Broadband service. – For the purposes of this section, a ~~terrestrially deployed~~ mass-market retail service by wire or radio that provides the capability to transmit data to and receive data from all or substantially all internet endpoints, including any capabilities that are incidental to and enable the operation of the communications service, but excluding dial-up internet access service.

...

- (8) ~~Extremely high cost per location threshold. – A BEAD subsidy cost per location above which the Office may decline to select a proposal if use of an alternative technology meeting the BEAD Program's technical requirements is necessitated by the fact that selection of an eligible project proposing to provision service via end-to-end fiber optic facilities to each end user premises would be cost prohibitive. The Office will develop a methodology for calculating this threshold in a manner that maximizes use of the best available technology while ensuring that the program can, at a minimum, meet the prioritization requirements. The Office will post the methodology for public comment before implementation. The Office shall not, unless it is determined that it does not have sufficient funding to select each highest scoring application in the initial round described in this section, utilize the extremely high cost per location threshold in the initial round.~~

...

- (14) Low-cost broadband service option. ~~A broadband service offered to low income households that meets the eligibility requirements for the federal Affordable Connectivity Program, or similar replacement program, in the project area for at least the length of time defined by federal requirements. A low-cost broadband service option must be made available and include the following elements:~~ As defined in the IIJA as interpreted by any subsequent guidance issued by NTIA.

- a. ~~Provide typical download speeds of at least 100 Mbps and typical upload speeds of at least 20 Mbps.~~
- b. ~~Provide typical latency measurements of no more than 100 milliseconds.~~
- c. ~~Not be subject to nongovernmental imposed surcharges and be subject only to the same acceptable use policies to which subscribers to all other broadband internet access service plans offered to home subscribers by the participating subgrantee must adhere.~~
- d. ~~Shall be offered at a price that does not exceed the highest price listed in the FCC's 2024 Urban Rate Survey data for Fixed Broadband Service for a service offering in North Carolina that provides a download speed of 100 Mbps, upload speed of 20 Mbps, and an unlimited capacity allowance. The price may be adjusted by the subgrantee based on the Consumer Price Index, as defined by the United States Bureau of Labor Statistics, beginning with an adjustment in the first new calendar year after the date of enactment of this section.~~
- e. ~~In the event the provider later increases the speeds of one of its low-cost plans, it will permit eligible subscribers that are subscribed to that plan to upgrade to those new speeds at no more than a commensurate change in cost.~~
- ...
- (20) ~~Reliable broadband service. – Terrestrial-based broadband service (i) with ninety-five percent (95%) of latency measurements during testing windows falling at or below 100 milliseconds round-trip time and (ii) which is designed to ensure that network outages should not exceed, on average, 48 hours over any 365-day period except in the case of natural disasters or other force majeure occurrences. Locations served exclusively by satellite, terrestrial fixed wireless services utilizing entirely licensed spectrum, using a hybrid of licensed and unlicensed spectrum, or a technology not specified by the FCC for purposes of its Broadband DATA Maps do not meet the definition of "reliable broadband service" and will be considered "unserved" for the purposes of determining eligible locations. As defined in the IIJA as interpreted by any subsequent guidance issued by NTIA.~~
- (21) Secretary. – The Secretary of Information Technology.
- (22) Subgrantee. – An eligible recipient who receives BEAD funds for an eligible project.
- (23) Underserved. – ~~A BSL that has access to reliable broadband service equal to or greater than 25 Mbps download and 3 Mbps upload but less than 100 Mbps download and 20 Mbps upload. Unless otherwise determined by the Department based on competent findings of fact, locations that the FCC's Broadband DATA Maps show to have available qualifying broadband service delivered via (i) DSL or (ii) terrestrial fixed wireless services utilizing entirely licensed spectrum, or using a hybrid of licensed and unlicensed spectrum, shall be considered "underserved" for the purpose of determining eligible locations. As defined in the IIJA as interpreted by any subsequent guidance issued by NTIA.~~
- (24) Unserved. – ~~A BSL that does not have access to reliable broadband service with transmission speeds of at least 25 Mbps download and at least 3 Mbps upload. As defined in the IIJA as interpreted by any subsequent guidance issued by NTIA.~~
- ...

"SECTION 10.2.(j) Competitive Subgrantee Selection Process. – The Office shall implement a competitive subgrantee selection process that conforms with published regulations and guidelines under the BEAD Program under the IJA. Applications receiving the highest score shall receive priority status for the awarding of subgrants pursuant to this section. ~~As a means of breaking a tie for applications receiving the same score, the Office shall give priority to the application proposing to serve the highest number of new unserved and underserved locations.~~ Applications shall be scored on an objective 100-point scale that is published prior to the submission of applications for subgrants. The Office shall determine whether or not a subgrantee has the capacity to perform multiple projects and shall not be required to award multiple projects to a prequalified subgrantee that has failed to demonstrate its ability to perform.
