

HOUSE BILL 1033: Identification Card Fee Waiver/Disability.

2015-2016 General Assembly

Committee: Date: August 9, 2016
Introduced by: Prepared by: Giles Perry

Analysis of: S.L. 2016-80 Staff Attorney

OVERVIEW: S.L. 2016-80 adds persons who have developmental disabilities to the list of persons for whom the \$13 application fee to obtain a special identification card is waived.

This act becomes effective October 1, 2016, and applies to special identification cards issued on or after that date.

CURRENT LAW: G.S. 20-37.7 governs the issuance of special identification cards. Any person who is a resident of North Carolina is eligible for a special identification card and, unless an exemption applies pursuant to 20-37.7(d), a person must pay an application fee of thirteen dollars (\$13.00). The current list of exemptions require the applicant to be one of the following:

- Blind:
- At least 70 years old;
- Physically or mentally disabled, which caused a cancellation of the applicant's driver's license;
- Homeless;
- Registered to vote in North Carolina with no acceptable photo identification; or
- Attempting to register to vote in North Carolina with no acceptable photo identification.

BILL ANALYSIS: This act adds another exemption from the special identification card application fee for a person who can demonstrate via a primary care provider's letter to the Division of Motor Vehicles that the person has a developmental disability. The term "developmental disability" is defined under G.S. 122C-3(12a) to mean a severe, chronic disability of a person that:

- Is attributable to a mental or physical impairment or combination of mental and physical impairments;
- Is manifested before the person attains age 22, unless the disability is caused by a traumatic head injury and is manifested after age 22;
- Is likely to continue indefinitely;
- Results in substantial functional limitations in three or more of the following areas of major life
 activity: self-care, receptive and expressive language, capacity for independent living, learning,
 mobility, self-direction and economic self-sufficiency; and
- Reflects the person's need for a combination and sequence of special interdisciplinary, or generic care, treatment, or other services which are of a lifelong or extended duration and are individually planned and coordinated; or
- When applied to children from birth through four years of age, may be evidenced as a developmental delay.
