

# HOUSE BILL 698: Baby Carlie Nugent Bill

2015-2016 General Assembly

---

<b>Committee:</b>		<b>Date:</b>	September 21, 2015
<b>Introduced by:</b>	Reps. Jeter, Lambeth, Adcock	<b>Prepared by:</b>	Theresa Matula
<b>Analysis of:</b>	Third Edition		Legislative Analyst

---

**SUMMARY:** *House Bill 698 requires the Commission for Public Health to adopt rules to implement a screening test for severe combined immunodeficiency (SCID) and other T-Cell lymphopenias detectable as a result of SCID.*

**CURRENT LAW:** G.S. 130A-125 pertains to the screening of newborns for metabolic and other hereditary and congenital disorders. G.S. 130A-25(a) requires the Department to establish and administer a Newborn Screening Program to include the development and distribution of educational materials regarding the availability and benefits of newborn screening; laboratory testing; the development of follow-up protocols to assure early treatment for identified children, and the provision of genetic counseling and support services; the provision of necessary dietary treatment products or medications for identified children; the provision of physiological screening in each ear for the presence of permanent hearing loss; and the provision of pulse oximetry screening to detect congenital heart defects.

**BILL ANALYSIS:** House Bill 698 requires the Commission for Public Health to amend the rules for the Newborn Screening Program to add to the newborn screening panel a screening test for severe combined immunodeficiency (SCID) and other T-Cell lymphopenias detectable as a result of SCID.

**EFFECTIVE DATE:** This bill becomes effective when it becomes law.

**BACKGROUND:** HB 698, v.2, contained a fee increase and an appropriation. These two sections of the bill have been removed since the fee increase is contained in Section 12E.12 of S.L. 2015-241 (HB 97) and the appropriation is reflected on page G11, Item 54, of the Joint Conference Committee Report on the Base, Expansion and Capital Budgets.

Newborns are tested through the State Laboratory of Public Health for a number of conditions and disorders. The following link provides NC newborn screening information:
