**OVERVIEW:** House Bill 445 would increase the maximum fee amounts that may be assessed for fire protection in Brunswick County.

**CURRENT LAW & BILL ANALYSIS:** Brunswick County has the authority to establish fee-supported fire districts to provide fire protection services throughout the county. "Fire protection" includes furnishing emergency medical, rescue, and ambulance services to protect people in the district from injury or death. The board may provide fire protection to the district by contracting for the services with someone else or by providing the service itself if it maintains or creates an organized fire department in the district. There are 37 fire districts and 22 fire departments in the county; 7 of the departments are owned and operated by the municipal governments.

Each district has a committee that exercises control over the fee-setting process. The committee must conduct an inquiry into the amount of funds required by the district to meet its needs and recommend a fee to the board of commissioners. The board then sets the fee. The fee may not exceed the cost of providing fire protection services within the district, and the amount is based on the class of property as set out in the table below. The fee may be included on the property owner's property tax bill.

The board of commissioners has passed a resolution seeking to amend the maximum fee amounts because the current amounts are outdated and insufficient to meet the needs of the growing population. The fees were last increased in 2007. If this legislation passes, the commissioners intend to implement a 25% across the board increase.
