OVERVIEW: *Section 12.15 of S.L. 2023-134 amends Section 1 of S.L. 2023-55, to clarify that if a permittee for a wastewater treatment system exceeds its currently permitted monthly flow more than once in any 12-month period, the permittee cannot allocate more than 100% of the existing system's hydraulic capacity until the permittee complies with the permitted monthly flow for at least 12 consecutive months.*

S.L. 2023-55 allows a permittee for a wastewater treatment system to allocate more than 100% of its existing hydraulic capacity where the permittee meets certain location, expansion, and discharge conditions.

This section became effective July 1, 2023.
